DESTARNY APP HELPS TAXI DRIVERS COMPETE IN AN UNFAIR AND UNEVEN PLAYING FIELD

Taxi drivers would all be familiar with the unfair advantages that ride-share apps like Uber have over the taxi industry.

Destarny changes all this by giving taxi drivers the ability to compete in the booking fare market by turning previously empty return trips into profits and edge out their ride-share competitors without hurting their hail and rank work.

WHY YOU SHOULD JOIN?

- Supplement traditional hail and rank income with increased booking fare work
- Gives you the power to accept dynamic prices depending on how busy you are
- Allowing taxis to compete flexibly in the changed transport landscape
- Reducing the market power of ride sharing apps like Uber by putting taxis back in the game for booking fare work

HOW IT WORKS?

Destarny supplements traditional taxi meter pricing rates by also offering:

- Destarny x1.0: price matching UberX cheapest metered rate
- Premium HC Plate: pricing approximately 20% more than taxi meter pricing
- Set fare booking: a fixed price for a trip set by passengers

Taxi drivers who sign up with Destarny can view all customer requests including destination and can choose which to accept.

By offering different pricing options, Destarny allows taxis to compete on price in quiet times, but also gives them the ability to take on higher fares when surge pricing kicks in other ride sharing services. If taxis choose to compete in this market for a few months they will greatly reduce the efficiency of rideshare vehicles.

WHO CAN JOIN?

DESTARNY has been developed exclusively to help the taxi industry compete in the booking fare market and is only available to professional taxi drivers.

At some point in the future DESTARNY will offer taxi drivers future scope for growth in the use of the service by allowing active taxi drivers to roll out additional vehicles to meet peak demand but again exclusively under an active taxi driver.

QUESTIONS

If you are for taxi's why do you have private hire cars?

Currently we don't have any private hire cars and we are just showing the consumers that they are coming so we can look to be on trend and when we eventually roll them out they will be exclusively operated under a taxi driver who will also pocket 10% from private hire car trip. The truth is at a minimum Taxi's are \$25,000 a year more expensive to operate due to regulatory costs. Now that the government moved the goal posts it would be foolish for us to surrender the new market to our competitors. Let's improve the taxi business and take the new market as well.

Additionally let's not forget that taxis have a supply limit so unless we roll out a great number of vehicles during peak periods there would still be a space for Uber type apps during high demand periods. Therefore we must leverage the taxi industries sustainable competitive advantage and bring back value to the taxi plate while also growing our pie in the new market.

Remember DESTARNY was created by a fellow operator / taxi driver who is on your side. DESTARNY fees are 5% for CASH transactions and 10% for CREDIT; giving DESTARNY a 5% income for marketing and development. Taxi Drivers who support the app early will be rewarded as soon as DESTARNY has the means to do so. Currently the consumer does not know about the app but passenger marketing will begin as soon as we have a hundred regular drivers registered.
